

Farm Safety and Rail Crossings Webinar

Presenter Bios

Li-Lian Lui, P.Eng., M.Eng., PMP

Li-Lian has been in the railway industry for more than 10 years. She began her career working for Canadian Pacific Railway where she managed third party grade crossing & bridge projects. She then continued on to work with Transport Canada as a Railway Works Engineer during the roll-out of the Grade Crossing Regulations. She now consults for railways, road authorities, and contractors on railway safety. Li-Lian has inspected over 1000 crossings in Ontario & Quebec for safety compliance and whistle cessation. She is fluent in the legal requirements at grade crossings and their practical applications in the field. She is eager to share her knowledge with all crossing stakeholders as she believes awareness is the key to improving rail & public safety.

Daniel Goodfellow, PMP, NCSO

Daniel is the Operations Director with Partum Consulting Inc. He has been in the construction industry for more than a decade. He has extensive experience in contract planning, execution, and negotiation which allows him to lead with a holistic understanding of project needs. Daniel has been involved with grade crossing inspections, and also acts a reliable resource to railway clients for project management activities. His mandate is to be a leader who prioritizes the advancement of rail & public safety.
